

DUBAI KARTDROME ENDURANCE CHAMPIONSHIP

Date : 13th February 2026

Event: 2026 DUBAI KARTDROME ENDURANCE CHAMPIONSHIP

Subject: Bulletin: #1

Amendment to Regulation #9d – Driver Weight & Arm Badge Compliance

Dear Team Managers, Captains, and Drivers,

Please be advised of the following amendment to **Regulation #9d** of the **2026 Dubai Kartdrome Endurance Sporting Regulations**:

All drivers' arm badges **must be updated with the correct weight to be carried** prior to the driver entering the kart during any period of the event.

Any additional ballast or weight added to the kart **without the corresponding update on the driver's arm badge** will **not** be taken into account during:

- Driver weigh-in at driver change, or
- Post-stint weight checks.

Example:

If a driver is concerned about meeting the minimum weight requirement and chooses to carry additional weight to compensate for potential weight loss during a stint, but fails to update their arm badge accordingly, that extra weight will **not** be considered during the official weigh-in.

Should the driver be found underweight, a penalty for being **UNDER WEIGHT** will apply – regardless if extra weight was in the kart.

All teams and drivers are reminded that compliance with this procedure is mandatory and will be strictly enforced.

Best Regards,

David Bright
Race Director
